a. Schools	£20
b. Funded community projects	£50
c. Statutory organisations and private businesses	£120

Conditions of Use and Safety Instructions

1. The organisation or individual renting the *Blender Bike* must have full public liability insurance cover in case of an accident while the *Blender Bike* is in their possession. Proof of insurance cover may be required.
2. The organisation renting the blender should ensure that the blender jug is sterilised before and after use with a suitable product to avoid contamination.
3. The *Blender Bike* is collected and returned on agreed dates with a Common Cause employee present to ensure all parts are sent out and returned.
4. Any breakages or difficulties experienced are reported to Common Cause.
5. There must always be two adults to move and supervise the *Blender Bike*. This is due to its size and weight and to stop children touching the working parts, fingers being caught or the blender jug being thrown off its stand if the bike shakes from vigorous cycling by larger children or adults showing off!
6. Small children must be held on or sit on an adults lap when they peddle.
7. The **lever** that engages the blender should always left in the “**off**” position when the blender flask is removed. If it is pressed on without the blender in place, a connecting piece wizzes round and round and could be a hazard to small investigative fingers! The blender must be fitted so that it is properly in position. This may require a bit of iggling to make sure that it is level and fully slotted into place.
8. Keep any perishable ingredients cool

I have read and agree to the above conditions and the safety issues and have public liability insurance in place for use of this bicycle powered blender.
